About This Game

Super Man Or Monster is a monsterfilled, explosive, third person action game with a delightful 8-bit style. You choose if you want to fight with MAN to protect the world, or be a MONSTER and destroy it!

Super Man Or Monster?!

Man - Build your army, fly around with your jetpack and blast monsters. Anything you deploy you can pilot yourself, from turrets and tanks to helicopters! Kick ass. Monster - Bash, stomp and wreck cities with brute force and special powers like fireballs and body slams. Bring the chaos!

What's so super about it?

We're taking the classic Man Or Monster (a simple voxel browser game) to the next level by adding all stuff we didn't have time for back then. We've added controller support, full screen retro visuals, lots of new content and a splitscreen local multiplayer mode that's pretty awesome if we do say so ourselves (we do)!

Features

- Play as Man or as Monster. Two very different experiences for the price of one!
- Explore more than 30 of the world's biggest cities in glorious cubestyle.

-
- Splitscreen local multiplayer game mode: Man versus Monster.
 - Unlock tons of units, monsters, special attacks and trophies.
 - 8-bit look now in three dimensions.
 - Super catchy retro chiptunes!
 - A jetpack and fart-attacks. Need I say more?

Hints are confusing, grammar/writing is subpar, and the visuals are a weird mishmash of uncanny valley♥♥♥♥♥3d and what look like photos taken straight from Google images, not to mention the plot development & ending are BEYOND unsatisfying.

All in all, pretty much what you'd expect from a game of this price.

Honestly, it's not THAT bad - plus, it's super damn cheap, which is great. TBh I really wish Steam had a 'meh' review button, just for games like this.. Not as different from other 4X games as the original, this iteration is still as good. Think of it as HoMM IV - it's certainly true to its roots, but it's a leap in another direction.

The campaign map features an additional subterranean level and feels bigger, busier and more out of control than that of Age of Wonders, but the battles have been scaled down somewhat and the custom hero feature suffers from a greater focus on the campaign.

As a stand alone game, it isn't as inviting as AoW, but after mastering its predecessor, it's an ideal dessert.. No, unless you're really struggling for some SNES nostalgia...there are better 8 bit hack and jump adventures out there. Get a new weapon? Yay, can't switch back? The axes are terrible. Just one of many small things I didn't enjoy in my admittedly very short playtime. Soundtrack is nice though...

Edit: Got this as part of Humble Bundle. Not my kind of game, don't be put off, if a 20 year old retro game is exactly what you're looking for. There are no modern features here.. A great starter pack, I just got a couple friends into the game and this is definately nice to help get them to level 20 thru their constant deaths, and allows them some starter pets. Definately makes the path to learning the game a little bit clearer and less frustrating. and a couple of loot drop potions is always a plus whether your a noob or a pro.. Multiplayer would be nice.. Fun game with a Binding of Isaac kind of style. Interesting controller support, I love that you can map it however you want to fit your controller.

+1 for awesome devs too. We probably came back to annoy them\play their game demo about 20+ times during pax east.

It's pretty cool but the whole voice thing is really frustrating.. On surface level the concept seems very interesting. For once, instead of killing monsters and shooting people, you get to grow a flower and spread new life! With multiple different flowers and an upgrade system you're bound to have many hours of fun here, right?

Well, sadly no. There doesn't seem to be any way to really strategize the growing of your flowers, since there's actually only one right way to grow all the flowers, which there are four visually different ones, but which play identically. Reach for the Sun really feels like a simple flash game made as a proof-of-concept or something similar. Play time is somewhere under an hour after which you have gained everything and done everything.

A shame really. With extended gameplay and more interesting mechanics the game could potentially be a unique little flower, but currently it is just over-priced run-of-the-mill flash game you could find on any website.. I'm going to give this a recommendation, because excluding the fact that the community appears to be dead, it's a good game! It's very fun as a very unique multiplayer 'shooter' in a steampunk setting with cannons and several secondary weapons available at your disposal, in a game that requires teamwork to survive. It has good graphics, fun gameplay and simple and easy to navigate menus (including a well thought out in-game tutorial). If you can get this on sale and you have a bunch of friends to play it with, go for it! I wholeheartedly recommend this title, just please note that the community is currently dead, it certainly needs a revival or a group (which I'm sure exists) to schedule a play session for you to be likely to see another player online. So yes, the game itself is great, but the community is non-existent - buy at your own risk!. This is an amazing VR project. Besides, it's completely free. You are in a real museum. You see real paintings and sculptures. Incredible feelings and thoughts! I highly recommend it!. This game is pretty decent for being 10 years old. There are people in the chat who make the game easier to understand and play. I do recommend it if you're bored and just want a little fun to play or even make fun of.. I just want to turn off the auto shot. Like clicking the aims....
